

Aya BRIKSINE

Engineering Student – Mechatronics, Robotics & Automation (MSc, 2nd year)

Seeking a 6-month end-of-studies internship in robotics / AI – from February 2027

Orléans, France | +33 7 46 53 44 79 | briksinea@gmail.com

linkedin.com/in/aya-briksine | Willing to relocate

Profile

Second-year MSc student in Mechatronics, Robotics and Automation at Polytech Orléans, with hands-on experience on a **Stäubli 6-axis industrial robot**, PLCs and mobile robotics, strong **Python** skills, plus **3 years of professional experience** in application development and technical project management. Driven by intervention robotics, teleoperation and the use of AI for robot control.

Education

MSc in Mechatronics, Robotics and Automation (M1 – M2)

Polytech Orléans – University of Orléans

Sept. 2025 – 2027

Orléans, France

- Coursework: robot modelling and control, automatic control, computer vision, industrial computing.

Professional Bachelor's – Industrial Operations Engineering and Digitalisation

UM6P – Mohammed VI Polytechnic University

Sept. 2019 – Nov. 2022

Benguerir, Morocco

Robotics Projects and Activities

Project – Autonomous Obstacle-Avoidance Mobile Robot

Polytech Orléans – M1 team project

2025 – 2026

- Designed and programmed a mobile robot that autonomously detects and avoids obstacles: sensor integration, avoidance algorithm, motor control and testing.

Industrial Robotics and Control Lab Work

Polytech Orléans – M1

Mar. – Jun. 2026

- **Stäubli TX60 6-axis industrial robot**: programming in **VAL3**, teach pendant and **Stäubli Robotics Suite**, trajectory and pick-and-place tasks.
- **Robotic arm control (CLIMAX)**: PLC programming with **PL7 Pro** in **Grafcet (SFC)** and **Ladder**.
- **DC motor speed control**: theoretical study, modelling and simulation in **MATLAB**, controller tuning and experimental validation.

Member – Robotek Orléans, robotics club

Student association

Since Sept. 2026

Orléans

- Taking part in the design, programming and testing of mobile robots as part of a team.

Professional Experience

Digital Transformation Project Manager

BROS-COM (6-month internship, then 2-year fixed-term contract)

Dec. 2022 – Apr. 2025

Laâyoune, Morocco – Hybrid

- Led digitalisation projects: requirements gathering, writing specifications, planning and follow-up.
- Coordinated technical and business teams; reported progress regularly to management.

Digital Transformation Consultant

DB Growth – Full-time

Sept. 2023 – Sept. 2024

Remote

- Analysed client processes, selected digital solutions, designed dashboards and trained end users.

Final-Year Internship – Monitoring Application Development

Green Energy Park (IRESEN / UM6P)

Mar. 2022 – Jul. 2022

Benguerir, Morocco

- Designed and developed a **web/mobile application** to monitor, control and log sensor data from a greenhouse used for heating sewage sludge.
- Data acquisition and storage, real-time visualisation, operator interface; on-site testing and validation.

Skills

Programming

3D / Vision

Robotics / Control

Tools

Project management

Languages

Python (strong) – applications and interfaces; C/C++, Java, web/mobile development

Point clouds and 3D visualisation with **Open3D** and **PyVista**, Python GUIs (Tkinter) – self-training

Stäubli robots (VAL3, Stäubli Robotics Suite), PLCs (PL7 Pro, Grafcet, Ladder), feedback control, mobile robotics; computer vision, machine learning fundamentals

MATLAB/Simulink, Git, IntelliJ IDEA, Replit, HubSpot

Specifications, planning, reporting, change management, multidisciplinary teamwork

French (fluent), English (professional), Arabic (native)
